PROFESSIONAL SUMMARY

Certified Senior Bubble Developer and AI Product Engineer with a Master's in Engineering Management. Expert in architecting complex, scalable web applications, combining Production Engineering rigor with No-Code and AI velocity. Leverages Claude Code, Lovable, and Figma Make to deliver enterprise-grade logic at speed. Adept at translating technical complexity into business clarity across global projects.

PROFESSIONAL EXPERIENCE

Operations Manager & Full-Stack AI/No-Code Developer

Blur Studio

REMOTE

Sep 2025 – Present

Operational Leadership

- Lead discovery phases translating client visions into Project Playbooks, prototypes, and task roadmaps.
- Architected the internal 'Company OS' — managing SOPs, OKRs, talent pools, and leads.
- Built a Project Management System, Feedback Rating System, and AI-driven Business Idea Refiner.

Full-Stack AI & No-Code Development

- Use Figma Make to turn Playbooks into clickable prototypes; deploy scalable apps with Claude Code, Lovable & Bubble.

Senior Bubble Developer & AI Product Engineer

Freelance / Independent

REMOTE

Jan 2022 – Present

Core Bubble.io Expertise

- Complex Backend Architecture: High-performance database structures and sophisticated API connectors for high-volume data.
- Advanced Logic & Workflows: Intricate 'code-like' logic and custom states solving complex business problems beyond standard templates.
- Scalability & UI/UX: Optimizing apps from MVP to thousands of users; bridging Figma design to responsive Bubble elements.

Bubble Developer

Goodspeed

REMOTE

Feb 2024 – Sep 2024

Full-Stack Engineering

- Owned the full Bubble.io stack: frontend design, backend workflows, optimized schemas, and third-party API integrations.
- Structured scalable data models for high performance and long-term maintainability.

Product & Project Management

- Translated Figma prototypes into technical requirements; managed milestones from wireframing to final QA and deployment.

Intern

Bryan Cassady

REMOTE

Jun 2020 – Feb 2022

- Developed a company scalability & innovation-readiness assessment tool grounded in 10+ years of research studies.
- Led design and data analysis; translated a published book on innovation from English to Portuguese.

Intern / Project Intern

NTG – UFV & CenTev/UFV

2011 – 2015 · Brazil

- Developed 8 Technological Plan worksheets guiding new product development across technology-based companies.
- Authored a Technical, Economic, Commercial & Environmental feasibility study that guided executive investment decisions.
